

## Viega joins TEPPFA, strengthening the association's leadership in Europe

Communication: 4 March 2025

TEPPFA is glad to announce that it is expanding its membership base with Viega. This new collaboration underscores the increasing recognition of TEPPFA's role in advancing the plastic pipes and fittings industry across Europe and reflects the ongoing success of its governance.

Ludo Debever, General Manager: "We are excited to welcome Viega into our network. Headquartered in Attendorn, Germany and with its strong legacy of over 125 years and its commitment to quality, Viega brings valuable expertise to TEPPFA. As a family-owned business, spanning five generations, Viega's decision to join, reflects the importance of being part of a leading European trade association. Together, we will continue to advance the sustainable and competitive future of the pipe manufacturing industry."

Viega is an expert in healthy drinking water in buildings and is one of the global market and technology leaders in the installation sector. As a high quality-focused family business employing more than 5,500 people - including 200 young vocational trainees - internationally, the company has over 125 years of experience in building technology. Its core areas of expertise include maintaining and developing drinking water hygiene, energy efficiency, comfort and safety in buildings. With 10 locations around the world, the company group produces more than 17,000 products and systems.

#### About TEPPFA

TEPPFA is the European Plastic Pipes and Fittings Association founded in 1991 with headquarters in Brussels. TEPPFA's 14 multinational company members and 13 national associations across Europe represent 350 companies that manufacture plastic pipes and fittings. TEPPFA members' final products have an annual production volume of 4 million tonnes directly employing 40,000 people with €12 billion combined annual sales. TEPPFA positions itself as polymer neutral. TEPPFA members' final products are subdivided into two application groups: above ground systems for hot and cold water, surface heating and cooling, waste water discharge and rainwater drainage, and below ground systems for sewers, stormwater and drainage, drinking water and gas supply and, cable ducts.
