

Dr. Przemyslaw Hruszka has been appointed as TEPPFA new Technical Manager

Communication: 18 March 2025

TEPPFA is pleased to announce the appointment of Dr. Hruszka as its new Technical Manager, effective March 2025.

Dr. Hruszka will succeed Peter Sejersen, who, after nearly a decade of dedicated service to TEPPFA, has chosen to scale back his professional activities to the Nordic region following his official retirement.

A Polish national, Dr. Hruszka holds a Doctorate in Technical Science in Chemical Technology and a Master of Science in Material Science Engineering. Prior to joining TEPPFA, he served as the Global Manager for Standardisation, Certification, and Product Regulation at Wavin Technology & Innovation in the Netherlands, and as Certification and Standardisation Manager at Wavin Poland. Wavin is a TEPPFA member company and part of the Orbia Group.

Ludo Debever, General Manager of TEPPFA, commented: "We are thrilled to welcome Przemyslaw to the TEPPFA team. Finding an industry expert to support our critical working groups on Standardisation and Certification, as well as Drinking Water Quality, was no easy task. Peter Sejersen's invaluable expertise played a pivotal role in driving TEPPFA's technical projects forward. We extend our heartfelt thanks to Peter for his passion, dedication, and unwavering support over the past decade.

I am confident that Przemyslaw will bring a similar level of expertise, which is vital for supporting our new governance and advocacy approach. Additionally, his insights from Eastern Europe will be invaluable in addressing the region's significant infrastructure needs. Our members, plastic pipes and fittings manufacturers, are dedicated to improving living standards and especially enhancing water infrastructure for citizens across Europe."

About TEPPFA

TEPPFA is the European Plastic Pipes and Fittings Association founded in 1991 with headquarters in Brussels. TEPPFA's 14 multinational company members and 13 national associations across Europe represent 350 companies that manufacture plastic pipes and fittings. TEPPFA members' final products have an annual production volume of 4 million tonnes directly employing 40,000 people with €12 billion combined annual sales. TEPPFA positions itself as polymer neutral. TEPPFA members' final products are subdivided into two application groups: above ground systems for hot and cold water, surface heating and cooling, waste water discharge and rainwater drainage, and below ground systems for sewers, stormwater and drainage, drinking water and gas supply and, cable ducts.
